

KENYA MOTOR SPORTS FEDERATION ENVIRONMENTAL POLICY

Policy Statement

KMSF is committed to the continual improvement of our environmental management and performance. We commit to reduce our impact on the environment, prevent pollution and ensure compliance with all the applicable legislations through the implementation of an environmental policy and environmental management system (EMS). Our commitment to the environment extends to the key stakeholders and the community in which we operate.

Key Initiatives for Continual Improvement

KMSF recognizes the global importance of environmental conservation, and reduction of our carbon footprint is a key concern. As a result, we commit to actively strive to reduce our impact on the environment. In particular, we will achieve this through our commitment to:

- Comply with all relevant environmental legislation and regulations through an Environmental Management System (EMS) which will be documented and maintained in line with our targets and objectives;
- Involve the relevant stake holders in our environmental programme and provide necessary training to enable them discharge their responsibilities in their areas of activity;
- Regularly review the environmental impact of our activities to see if we are meeting our environmental objectives;
- sustain a programme of continual improvement in environmental performance incorporating suitable measurements and monitoring mechanisms;
- Work with key suppliers to encourage them to develop environmental best practice;
- Continuously improve on resource efficiency (including our use of water, energy and raw materials).

Specific Targets during the Rallying Events:

We are committed to minimising the environmental impact during motor sport activities. Wherever possible, KMSF aims to:

- Assess the environmental impacts of motor sport activities during the rallying events;
- Reduce the amount of waste produced;
- Reduce the consumption of raw materials, water and fuels;
- Reduce and/or limit the discharge of pollutants to water, land and air;
- Use recyclable and renewable materials in place of virgin products where possible;
- Limit the noise within and during the events to the allowable legal limit.
- Lessen the risk to officials, competitors, spectators and members of the public from any risks associated with motor sports.

Kenya motor sports federation recognises the importance of environmental protection and will comply with all environmental legislation, regulations and appropriate codes of practice relating to the processes and activities of the KMSF. It is the KMSF objective to co-operate and maintain good relations with all regulatory authorities.

KMSF will foster environmental awareness and understanding to all officials, competitors, suppliers, spectators, subcontractors and other key stakeholders. Where practicable, KMSF will provide information and assistance to all stakeholders on environmental issues arising from motor sports.
